International Facade Design and Construction

There are not many schools, that offer a course like this in the world", states Peeraphol Chirayucharoensak from Thailand. There he was employed as architect for the last three years before coming to Germany. For the post-graduate Master course he quitted his job and came to Detmold. "Everybody at home said: If you want to specify in engineering, you need to go to Germany." \_

The University of Applied Sciences in Detmold offers this post-graduate Master course with its partnering universities in Delft (Netherlands) and Luzern (Switzerland). Assumably Bath (Greatbrittain) and San Sebastian (Spain) will join the cooperation. There are not many programmes for architects and engineers in the world, that offer a detailed specialisation in terms of facade technologies and facade design.
